

HighJump Advantage Dashboard

Clarifying Vision for Vital Decision-Making

In a dynamic business environment where speed and change are constant managerial challenges, the HighJump™ Advantage Dashboard solution supports informed decision-making through fast access to the critical operational information you need. Easy to access and navigate over the Internet or corporate Intranet, HighJump Advantage Dashboard organizes and displays information about your distribution and supply chain processes using concise, intuitive graphics. Among the performance indicators that HighJump Advantage Dashboard puts at your fingertips are:

- Real-time inventory levels
- Real-time order volume
- Real-time order status
- Comparative graphics of metrics you select, based on the parameters you find most useful (i.e., time, region, product, etc.)

Vital Decision-Making

Gaining Clarity Into Your Operations

The Power of Real-Time Information

HighJump Advantage Dashboard provides you with strong visibility into your distribution operations by reducing information gaps. You can easily create personalized windows into specific warehouses or distribution centers to meet your needs.

Clear Comparisons That Facilitate Insight Into Distribution Dynamics

The comparative graphics generated by HighJump Advantage Dashboard help you to identify and anticipate trends—and to respond to them quickly and effectively—with much greater efficiency than was possible with traditional, paper-based analysis. For example, comparing order volumes on a week-to-week or day-to-day basis can significantly improve stocking levels and procurement pricing of consumables such as packaging materials. Likewise, comparing cycle times across various warehouses can help to optimize asset utilization across the enterprise.

Secure Information

Access to information through HighJump Advantage Dashboard is protected by username and password—allowing you to tightly control who sees what.

Flexible Configuration

Like many HighJump solutions, HighJump Advantage Dashboard empowers fast, cost-effective configuration. In today's accelerating markets, such flexibility helps your business respond to new requirements with agility.

Benefits	Features
Real-time information access to performance indicators—24/7/365	<ul style="list-style-type: none">• Extends managerial vision• Provides informed decision-making support• Reduces complexity
